

Most freelancers spend **30 minutes writing a proposal...**

...but only **2 minutes understanding the client.**

That's why so many pitches sound the same.

The freelancers who consistently win better projects usually have one thing in common:

They understand the client's business **before** they write a single sentence.

Imagine knowing:

- ✓ What the company actually does
- ✓ Their biggest challenges
- ✓ Their target audience
- ✓ Recent updates
- ✓ Opportunities you can mention naturally

Now imagine gathering all of that in minutes with AI.

That's exactly what this AI Client Research System helps you do.

It's not about sending more proposals.

It's about sending **smarter proposals** that feel personal from the very first line.

Comment "**RESEARCH**" and I'll send you the complete AI Client Research System through DM.

Save this post so your next client pitch starts with insight—not guesswork.
