

## THE AI THINKING METHOD

### The 5-Step THINK Framework

T → Target

H → Help

I → Information

N → Next Step

K → Keep Improving

This works with ChatGPT, Gemini, Claude, Perplexity, Grok, Copilot, and most modern AI assistants.

---

### STEP 1

#### T = TARGET

Never ask AI without knowing exactly what you want.

Bad

Help me study.

Good

Help me prepare for tomorrow's biology exam.

Bad

Write content.

Good

Write an Instagram caption for students preparing for placements.

---

Reusable Prompt

My target is:

  

---

Help me achieve this goal.

---

Example

My target is to score above 90% in Physics.

Help me prepare.

---

## **STEP 2**

### **H = HELP**

Tell AI who it should become.

People usually skip this.

Instead of

Explain marketing.

say

Act as a Digital Marketing Mentor.

Instead of

Write code.

say

Act as a Senior Python Developer.

Instead of

Improve my resume.

say

Act as an HR Manager hiring freshers.

---

Reusable Prompt

Act as a

---

Help me...

---

### Examples

Act as an IELTS Trainer.

Act as a Software Architect.

Act as a Career Coach.

Act as a College Professor.

Act as a Business Consultant.

---

### **STEP 3**

#### **I = INFORMATION**

AI isn't magic.

It only knows what you tell it.

Most people write

Write an email.

Instead provide context.

Example

I own a digital marketing agency.

My client delayed payment.

I want a polite reminder.

Professional tone.

Under 120 words.

The more useful information you provide, the more useful the answer becomes.

---

Reusable Prompt

Here is my context.

Audience:

Goal:

Problem:

Constraints:

Deadline:

Current situation:

---

Example

Audience:

College Students

Goal:

Increase webinar registrations

Platform:

Instagram

Tone:

Friendly

Length:

100 words

---

#### **STEP 4**

##### **N = NEXT STEP**

Most people stop after the first answer.

Professionals don't.

They refine.

Instead ask AI

Improve this.

Make it simpler.

Give another version.

Rewrite for beginners.

Make it more persuasive.

Add examples.

Remove jargon.

Shorten.

Expand.

Make it sound human.

Every follow-up improves quality.

---

Reusable Prompt

Now improve the previous answer.

Focus on

---

---

Example

Improve the previous answer.

Make it suitable for LinkedIn.

---

## **STEP 5**

### **K = KEEP IMPROVING**

The first answer is a draft.

The best answers come after iteration.

Useful follow-up prompts:

Critique this answer.

What is missing?

How would an expert improve this?

Give three alternatives.

What mistakes do beginners make?

Rate this answer out of 10.

Improve it to 10/10.

---

Example

Rate this blog out of 10.

Improve weak areas.

Rewrite the final version.

---

## **THE COMPLETE THINK MASTER PROMPT**

Users can save this as a reusable template:

Act as a [ROLE].

My target is:

[GOAL]

Here is my context:

[BACKGROUND]

Audience:

[AUDIENCE]

Constraints:

[LIMITS]

Please complete the task.

After answering:

1. Improve your first response.
  2. Suggest a better version.
  3. Point out anything I forgot.
  4. Give one expert-level recommendation.
- 

### **EXAMPLE 1 — Student**

Act as an Engineering Professor.

My target is to understand Operating Systems for tomorrow's exam.

Audience:

Second-year engineering student.

Explain using simple language.

After answering:

Give memory tricks.

Provide practice questions.

Suggest common mistakes.

---

### **EXAMPLE 2 — Freelancer**

Act as a Senior Upwork Consultant.

My target is to win web design clients.

Review my proposal.

Suggest improvements.

Rewrite it professionally.

Give three stronger opening lines.

---

### **EXAMPLE 3 — Business Owner**

Act as a Marketing Strategist.

My business sells handmade candles.

Create a Facebook ad.

Then improve it for conversions.

Suggest three stronger hooks.

Add one irresistible CTA.

---

#### **EXAMPLE 4 — Job Seeker**

Act as a Hiring Manager.

Review my resume.

Identify weak sections.

Rewrite the summary.

Suggest five ATS keywords.

Generate likely interview questions.

---

#### **EXAMPLE 5 — Content Creator**

Act as a Social Media Growth Expert.

Create an Instagram carousel.

Then rewrite it for LinkedIn.

Suggest a YouTube title.

Generate five thumbnail ideas.

Create a CTA that encourages comments.

---

#### **THE GOLDEN RULE**

Teach your audience this simple principle:

**The quality of your AI output depends on the quality of your thinking before you write the prompt.**

Great prompts come from clear goals, useful context, and iterative refinement—not from secret keywords or magic formulas.
