

THE AI CAREER ROADMAP FRAMEWORK™

A simple 7-step framework.

Framework Name

S.K.I.L.L.S. AI Career Roadmap

Step 1

S — Start With Your Goal

Never ask AI:

What skill should I learn?

Instead tell AI exactly who you are.

Example

- Student
- Mechanical Engineer
- B.Com Graduate
- Fresher
- Graphic Designer
- Accountant

Then define your goal.

Examples

- Remote Job
 - Higher Salary
 - Freelancing
 - Business
 - Career Switch
-

Reusable Prompt

Act as an experienced career advisor.

My current profile:

Education:

Experience:

Current Skills:

Country:

My goal is:

Recommend the top 10 future-proof skills ranked by:

- Job demand
- Salary potential
- AI-proofness
- Ease of learning
- Remote opportunities

Explain why each skill fits my background.

Example Output

AI recommends

1 Data Analytics

2 Prompt Engineering

3 UX Design

4 Digital Marketing

5 Automation

instead of random YouTube advice.

Step 2

K — Know Your Strengths

Most people copy trending skills.

Wrong.

AI should first identify YOUR strengths.

Reusable Prompt

Based on my background below, identify my strongest transferable skills.

Education:

Experience:

Projects:

Interests:

Suggest careers where these strengths provide an advantage.

Do not suggest careers unrelated to my profile.

Example

Engineering student

↓

Analytical Thinking

↓

Automation

↓

AI Tools

↓

Business Analytics

instead of

↓

Graphic Design

which may not suit them.

Step 3

I — Identify Market Demand

Don't learn skills nobody pays for.

Ask AI what companies actually need.

Reusable Prompt

Act as a global job market researcher.

List the fastest-growing skills for the next 5 years.

Rank them by

Hiring Demand

Average Salary

Freelance Opportunities

Business Opportunities

Difficulty

Future Growth

Present the results in a comparison table.

Example

Instead of

Learning MS Word

AI recommends

AI Automation

Python

SQL

Data Analytics

Cloud Computing

Prompt Engineering

Step 4

L — Learn In The Correct Order

Many people try learning everything.

AI builds a sequence.

Reusable Prompt

Create a beginner-to-advanced roadmap for learning

[Skill Name]

Break it into

Week 1

Week 2

Week 3

Week 4

Monthly Milestones

Projects

Portfolio Ideas

Free Resources

Paid Resources

Common Mistakes

Estimated Completion Time

Example

Digital Marketing Roadmap

↓

Marketing Basics

↓

SEO

↓

Content

↓

Ads

↓

Analytics

↓

Automation

instead of random videos.

Step 5

L — Launch Small Projects

Knowledge without projects means nothing.

Ask AI

Reusable Prompt

I am learning

[Skill]

Suggest 20 beginner portfolio projects that look impressive to recruiters.

Rank them from easy to advanced.

Explain which project gives maximum interview value.

Example

Learning Excel

↓

AI suggests

Sales Dashboard

Inventory Tracker

Finance Dashboard

instead of just practicing formulas.

Step 6

S — Show Your Skills Publicly

AI even helps create visibility.

Reusable Prompt

Act as a LinkedIn branding coach.

Based on my skill

Generate

30 LinkedIn post ideas

10 project ideas

10 networking messages

5 portfolio headlines

5 resume achievements

Help me become visible to recruiters.

Example

Instead of

Learning silently

↓

Recruiters start noticing your work.

Step 7

Weekly AI Career Review

Every Sunday

Review yourself.

Reusable Prompt

You are my weekly career coach.

Review my progress.

This week I learned:

Projects completed:

Time invested:

Skills improved:

What should I learn next?

What mistakes am I making?

Create my action plan for next week.
